### PROJECT DEVELOPMENT

In 2023, the Exhibition evolved to prove that it is indeed the largest industry-specific venue in the North-Western Russia where the issues of the municipal housing sector improvement are discussed, professional connections are established, and where advanced technologies, equipment, and materials are demonstrated.

The project is really unique thanks to its integrated approach to the key topic of the event. It is a comprehensive occasion, which includes demonstration of modern engineering utilities, presentation of out-of-the-box solutions for the municipal housing sector, including for waste management, security system proposals, and software. Moreover, during direct dialogues with authorities the most critical issues of the industry are discussed.

### SPECIAL FOCUS ON THE TOPICS IN 2023

- Creating comfortable urban environment, best practices
- Digital transformation of Russian cities and towns
- Development of the waste management system
- Innovative municipal housing solutions
